

INTRODUCING THE *FUEL ANGEL* MISFUEL PREVENTION DEVICE

Buford, GA. March 23, 2017. Fleet fueling equipment provider, EZ Fuel, introduces the industry's first misfuel prevention device, the *Fuel Angel*. This device is specifically engineered to prevent drivers from dispensing gasoline into a vehicle's diesel fuel tank. It fits most light duty diesel vehicles. This inexpensive device can save thousands of dollars in potential repairs and downtime. It is easy to install and includes a lifetime warranty.

"Everyone knows someone who has accidentally dispensed gasoline into a diesel vehicle. It is a common mistake and very costly for the owner of the vehicle. Fleet owners are particularly vulnerable with employees and driver's responsible for fueling their vehicles," stated Adam Polak, Vice President, EZ Fuel. Statistics show one in six diesel vehicles gets misfueled in its lifetime and the costs for repair average thousands of dollars!

A video and more information can be found on our website, www.MyFuelAngel.com, or you can call 866-992-5831 or email sales@MyFuelAngel.com.
